

## **“Readme\_first”**

### ***Common Class Interface Power Management Feature Specification***

Two revisions of the Interface Power Management Specification have been posted on the Web: v1.0rc4c and v1.0rc4d.

The revision history for these two revisions is shown on page 2 of v1.0rc4d, but that revision history is summarized in the Readme\_First file to help the reader decide which posted revision files to download and use.

<b>Revision</b>	<b>Filename</b>	<b>Recommendations for downloading</b>
v1.0rc4d, without change bars and revision marks	v1_rc4d.doc	The final release candidate. Co-authors (Intel and Microsoft) have made all changes suggested by Common Class Working Group and have made all edits for clarity. Unless significant change requests are received, at the e-mail address on page 3 of the specification, this will automatically become the Version 1.0 Feature Specification at the next USB DWG Common Class Working Group meeting. Download this file to do a final review of the specification.
v1.0rc4d, with change bars and revision marks	v1_rc4d_rev.doc	Download this file to see all the edits for clarity made by the co-authors. Edits to the v1.0rc4c version are shown as change bars and revision marks.
v1.0rc4c, without change bars and revision marks	v1_rc4c.doc	Contains all the changes agreed to at the last Common Class Working Group meeting at which this Feature specification was an agenda item. Download if tracking the changes in detail.
v1.0rc4c, with change bars and revision marks	v1_rc4c_rev.doc	Contains all the changes agreed to at the last Common Class Working Group meeting at which this Feature specification was an agenda item, with changes shown as change bars and revision marks. Download if tracking the changes in detail.
